About Us

Your Partner in Africa

Reboni Furniture Manufacturing is a proud member of the Masingita Group of Companies. Masingita is a 100% black-owned company, founded by Dr. Mike Nkuna in 1983.

Reboni has been manufacturing quality educational furniture for schools, colleges and universities, hospitals, hostels and offices since 1971. Today we are a market leader.

BEE Rating & Community Upliftment

Reboni is a certified Value Adding Level 1 BEE Contributor.

Reboni assists with skills development, ownership, management, socio-economic development, and preferential procurement in South Africa and further into the African continent, through collaborations with previously disadvantaged people, women, youth, people with disabilities & small business enterprises.

What We Do

Reboni is a well-known South African based manufacturer and exporter to the African continent. Our vision is to service the growing needs of educational institutions by providing furniture suitable for the African landscape with workable distribution strategies.

Size

Reboni's main manufacturing plant consists of a 12,000m² factory, with its own timber, board, steel, assembly and upholstery manufacturing sections. Reboni also has a number of assembly and redistribution operations throughout the country, which supports the local economic development in the provinces.

Export

Our knocked down furniture ranges are easy to assemble and more economical to transport, which improves the opportunity to uplift educational conditions in more remote areas, and at the maximum savings. We have satellite facilities across South Africa to ensure easy distribution throughout the continent.

Design

Although Reboni has the capacity to fulfil large orders, the design knowledge to manufacture to customer specifications and the logistical expertise to deliver to the most remote destinations, the quality of our product remains foremost.

Capacity

As the largest school furniture manufacturer in sub-Saharan Africa, Reboni has the capacity to seat millions of learners and tertiary students per annum.

Quality

Our school and office furniture has undergone independent testing and extensive development to ensure the highest durability and ergonomic designs. Reboni was the first furniture factory to be awarded the SABS mark on school furniture, and manufactures furniture that is compliant to:

Learnership Development

Our robust government-accredited training programme ensures that our staff has access to the knowledge that keeps Reboni at the forefront of technological advances and safety standards for the industry and empowers them as part of the Reboni team.
